

DIFU STOP ALU 120

Code	Commercial Description	Dimensions	Conf.	Pallet	Selling Unit
LUC70-9083	ALU Vapour Barrier	1,5 x 50m	1	40	CF

Description

Composed of 1 layer of aluminum with vapor barrier function and 1 layer of polyethylene reinforcement. Packaging = 1.50 x 50 m roll. Individually packed in cellophane.

Material

Aluminum and polyethylene

Use

Used as a barrier for vapor passage, it eliminates the risks of condensation and ensures the effectiveness of the insulation. Protects against water, air and wind infiltration.
