LUC70-907IN	PP black ridge vent roll - Upon request only	390 mm x 5 m	0	72	PZ

Description

Roof under-ridge in rolls, central part in PP (polypropylene), heat-sealed to the "flashings pleating elements on the sides made of aluminum or copper. Fabric of central part is UV resistant. Butyl strips on the intrados of flashings element made of aluminum or copper, makes the installation easier ensuring adherence to the brick. Resistant to temperatures from -40 ° C to 150 ° C.

Material

Manufactured in PVC with aluminium/copper pleating.

Use

Used to facilitate ventilation of the roof ridge.
