

ALUMINIUM UNDER-RIDGE

Code	Commercial Description	Dimensions	Conf.	Pallet	Selling Unit
LUC70-9074	ALUMINUM under-ridge 370	370 mm x 5 m	0	44	PZ

Description

Roof under-ridge in rolls, made of pleated aluminum. The holes in the central part of the body allow an optimal passage of the air flow (>145cm²/meter). High UV rays and temperature (from -20°C to 80°C) resistance Butyl strips on the intrados of the aluminum flashings elements, make the installation easier, ensuring adherence to the brick.

Material

Manufactured in plated aluminium.

Use

Used to improve ventilation of the roof ridge.
