

ANGLE BEAD FOR INTRAD

Code	Commercial Description	Dimensions	Conf.	Pallet	Selling Unit
ZIN33-1634	Fiber mesh internal angle	335 x 550 mm	50	39	CF

Description

Preformed angular for intrados white color (R131, corresponding to the net weight per square meter of the fiberglass mesh without resin). Packaged in boxes.

Material

Made of fiberglass mesh Adfors Saint-Gobain E type, impregnated with resins antialcaline SBR, axle spacing 3.5 x 3.8 mm and weight of 165 g/squared meter.

Use

Used to strengthen the intrados of the windows, to scatter the tensions and prevent cracking phenomena, ensuring the continuity of the frame structure in the insulation system.
