

### CURVED GALVANIZED STEEL ANGLE BEAD

Code	Commercial Description	Dimensions	Conf.	Pallet	Selling Unit
ZIN31-1662ZA	Curved Galvanized Steel Corner	30 x 30 x 3.000 mm	60	50	CF

#### Description

Galvanized steel corner perforated on both sides with inner surface hammered. Its shape profile follows curved elements and improves the gripping to the support. Dimensions 30 x 30 mm, with zinc coating weight of 200 g/square meter. Packaged in boxes.

#### Material

Made of galvanized steel.

#### Use

Used in protection/reinforcement of the plasterboard sheets corners and also in plasters for renovations inside buildings, particularly in architectural elements.
