ZIN32-1684	Balcony profile- grey color	2000 mm	20	1	0

Description

Profile for balconies pre-drilled to the upper edge and shaped to facilitate the drainage of rainwater and to protect the insulating panel.

Material

Made of aluminum treated against corrosion.

Use

Used in the construction and renovation of balconies, terraces and loggias to facilitate the drainage of water from the wall. The upper part of the profile is perforated to facilitate the flow of the adhesive and to ensure a more stable fixing.
