Description

Glass blocks produced according to high quality standards that ensures the maintenance of the characteristics (transparency, brightness, color) over time. Available in various sizes, both clear and colored (see table) and with different textures.

Material

Made of cast glass, laminated and varnished laterally to increase the gloss.

Use

Used for a variety of architectural solutions also acting as a structural element of furniture. It allows the passage of the light and/or singular chromatic effects in the environments.
