Description

The DAKUA+ linear shower drain range guarantees high functionality combined with a modern aesthetic. This model can be placed as desired. The block body shower channel drain is made of AISI 304 stainless steel that, thanks to the absence of bends, welds and screws, ensures an easy cleaning for high hygiene standards. The flow rate (44 litres/min) is high, even with lowered heights. All gratings are interchangeable and available in polished, brushed steel or glass. The kit is composed of:- A preassembled grating, ready for installation.- A waterproof polyester sheet, shaped on the edge of the channel.- A shower channel body and a stainless steel grating with glass coating.- ABS siphoned cup with joint and gasket. This shower channel is suitable for flat flooring and open showers, improves the aesthetics of the bathroom's floor surface whilst effectively collecting used shower waters.

Material

Stainless steel (channel and grating) - ABS (siphon and outlet body) - Waterproof polyester fabric (waterproofing sheet)

Use

This channel is used for the collection of the shower water. It fits perfectly with the floor embellishing the surface aesthetics.
