Description

Dak-Metal is a ribbed and stretched panel made from a cold rolled steel tape. The ribs are 4 mm high and the axle spacing is 10 cm. The panels have dimensions of 2500 x 600 mm.

Material

Galvanized steel plate, ribbed and stretched.

Use

Used for low thickness plaster. It avoids cracking evn in conjunctioni among different materials; ideal to arm a new plaster over a degraded one. It needs to be fixed in 6-8 points per square metre.
