Description

Rigid, weather-resistant polyurethane foam fastening element reinforced with two steel plates and injected with foam to ensure secure screw fastening to the base. A secondary-mounted aluminum plate for fastening elements and a compact (HPL) sheet optimize pressure distribution on the surface of the element.

Material

Support made of rigid polyurethane foam, steel, aluminum, and polyamide.

Use

Used for the external mounting of elements without thermal bridges in thermal insulation systems, ventilated walls, internal insulation systems, etc.
