

ECO CUBE FOR CONCRETE TESTING

Code	Commercial Description	Dimensions	Conf.	Pallet	Selling Unit
TER26-6310	Eco cube for concrete testing	172 x 172 x 165 mm	18	144	PZ

Description

Manufactured in accordance with D.M. 9/01/96, it allows the testing of concrete. Suitable for load test at simple compression. Can be used several times.

Material

Made polypro (PP).

Use

Fill the box of concret. Wait for the concrete to solidify (28 days). Extract the sample with a jet of compressed air or, if necessary, breaking the box along the perforation. Doesn't need any cover.
