Description

The Eco-Pluvial gully pot is an item for the collection and vertical runoff of the rain water. It allows the disposal of water from rain pipe of the gutter. It consists of: anti-reflux bulkhead; removable gasket to collect leaves or debris; perimeter reinforced with counterforce; entry cover with multi-diameter predisposition (80-125 mm); "open-closed" cover (customizable); Outlet diameter 80-100-110.

Material

Made of PP (polypropylene).

Use

Used as an element for the collection of rainwater from the rain pipe of the gutter, directly connected to the water system in the ground.
