

ANTI-CRACKING MESH FOR SCREED

| Code | Commercial Description | Dimensions | Conf. | Pallet | Selling Unit |
|------------|-------------------------------------|-------------|-------|--------|--------------|
| RET03-4040 | Anti-cracking Mesh in Rolls 40 x 40 | 1,00 x 50 m | 50 | 750 | M2 |

Description

Blue fiberglass mesh (identification code SGR120, corresponding to net weight per square meter of fiberglass mesh without resin), both available in dimensions 1.00 x 50 m.Packed in cellophane rolls.

Material

Made of fiber glass Adfors Saint-Gobain E type, impregnated with anti-alkaline resins SBR, mesh 40 x 40 mm (SGR120), with weight of 145 gr/m2.

Use

The RET03-4040 is used in the reinforcement of floor cement screeds and as an alternative to traditional wire mesh (wire rod) 100 x 200 cm, due to the large mesh, light-weight and workability, it is easy and quick to install on floors and walls.
