

LEVEL UP DECKING

Code	Commercial Description	Dimensions	Conf.	Pallet	Selling Unit
LV014	Tile made in thermotreated pine	600 x 600 x h.59 mm	0	72	PZ
LV015	Tile made in thermotreated ash	600 x 600 x h.59 mm	0	72	PZ

Description

Tile for exterior cladding
 Dimensions: 600 x 600 mm
 Made of plastic with a heat-treated wood finish (pine or ash). The main structure and deck boards are joined by 36 fastening points. The heat-treatment process is performed by exposing the wood to high temperatures of up to 220°C in a stainless steel oven, without the use of chemicals, inducing only heat, steam and water. This process significantly reduces the possibility of shrinkage, swelling or cracking. The durability characteristics are also improved, reaching values similar to those of the best tropical woods. Accessory kit that enables the perimeter sealing of the heat-treated wood tile system.

Material

Made of heat-treated wood (pine or ash) or WPC Shield on a high-performance PE-HD composite structure support.

Use

Use in outdoor areas, terraces, shared flooring.
