

FLOOR DECOUPLING MEMBRANE

Code	Commercial Description	Dimensions	Conf.	Pallet	Selling Unit
RET24-9420	Desolidarisation sheet 1 x 15 m	1 x 15 m	0	18	0

Description

Decoupling membrane to be applied under tiles and natural stones for perfect waterproofing. Two of the three layers that make it up are made of a non-woven polypropylene material, while the third, placed between the two, is made of low-density polyethylene (LDPE). Properties: Great decoupling properties Avoid cracking and breaking of the floor Thinner thickness with identical performance to other membranes Particularly suitable for renovations Waterproof and uniformly distributes heat Possibility of laying on fresh screeds thanks to the vapor management property Application similar to that of a waterproofing membrane Lower glue consumption per square meter Good stability and less deformation due to temperatures Suitable for outdoor applications They have drive-over characteristics Acoustic reduction of 6 dB (tested)

Material

Non-woven polypropylene and low-density polyethylene (LDPE)

Use

It can be applied on exterior balconies and terraces, in places where there are no living spaces, but also in domestic bathrooms, commercial kitchens, public and domestic shower rooms and damp areas in general.
