Description

The retractable ladder "Supra" is made with bolt-on steps to simplify substitution or addition. Available in a wide range of sizes (see table) to a maximum height of 3200 mm, wall, ceiling and tread width 80 mm. The retractable ladder "Supra" is equipped with a fixing system that allows to position the insoles also on a not perfectly flat surface. Incuded lock and "open-close" stick. Individually packed in shrink.

Material

The entire scale is made of tropicalized steel, powder sealed steel while the frame is made of galvanized steel, white enamelled finish.

Use

Usually used in homes and/or relevance and/or technical areas to reach attics without the encumbrance of a fixed ladder. The ergonomic shape of the steps functions as a handrail, while getting up and down the ladder.

Accessories

Code	Commercial Description	Dimensions	Conf.	Pallet	Selling Unit
