RET20-10700/9	Adhesive glass fiber tapes	h. 10,0 cm x 90 m	12	216	0

Description

White fiberglass mesh (identifier code. R72, corresponding to net weight per square meter of fiberglass mesh without resin).height available 1,00 x 50. Packed in cellophane rolls.

Material

Made of fiberglass Adfors Saint-Gobain type E, impregnated with resins antialcaline SBR,"tight" axle spacing 2.2 x 2.2 mm and a reduced weight of 70 g/m2.

Use

Utilized in the levelling for avoiding possible cracking in the presence of gypsum finishes and for joints between materials with different expansion coefficients, distributing uniformly the tensions to which they are subjected. fiberglass mesh particularly thin,

but with good tear resistance, ideal to reinforce liquid membranes (both acrylic resins as well epoxibituminose).
