#### Description

Keradeck® joist in aluminum for decking and paving. The peculiar structure of its surfaces allows on one side the application of clips for decking boards, and on the other side the laying of tiles for external raised floors. The use of the adapter guarantees a perfect fixing with Arkimede 35, 41, 60 and 115 supports. The connectors allow linear, T-shaped and overlapping junctions between several Keradeck® joists. The cross, once attached to the paving side, allows the equidistant laying of tiles for outdoor flooring.

#### Material

Adapter in PP (polypropylene), joist made of aluminum and accessories made of PA (polyamide).

Use

This product allows the making of a supporting structure for the laying of outdoor decking and paving.It is suggested to place the Arkimede supports every 50 cm
