Description

Two Level is a tile leveling system composed of spacers and leveling wedges in a kit, elements assembled through the use of the provided pincers. The kit allows to correct any difference in height between tile and tile during the installation in a quick and easy way, obtaining coplanar and equidistant result. The Two Level tile leveling system is available in full kit (100 pcs.) in 0.5, 1, 1.5, 2, 3 mm sizes.

Material

Made of recycled plastic material.

Use

A complete tile leveling kit with spacers and leveling wedges to be used as a leveling tool for tiles of various dimensions and sizes.
