GAN01-6455/X	Inspection door with LED strip	su misura			

Description

Plasterboard inspection hatches with recessed aluminum heat sink for housing led strip. 12.5-mm-thick plasterboard panel fully releasable with anti-fall device and concealed closure.- False ceiling, walls and counterparts - Moisture resistant- Releasable panel

Material

Aluminum frame and hydrophobic plasterboard panel.

Use

Installation of the inspection hatch and ceiling light becomes a one-time operation thanks to this revolutionary all-in-one product. With a single action, it will be possible to have both inspection and lighting functionality, achieving significant time savings. This state-of-the-art solution in lighting and drywall accessories combines an aluminum-framed inspection hatch with a removable door that integrates an LED ceiling light. It is a perfect solution for both inspecting plasterboard ceilings and illuminating spaces, ensuring quality lighting with minimal energy consumption, thanks to LED technology, and an impeccable aesthetic impact, thanks to its flush-wall design.
