

PROTECTIVE TAPE FOR JOIST

Code	Commercial Description	Dimensions	Conf.	Pallet	Selling Unit
TER09-1188	Protective tape for joist	80 x 20.000 mm - sp. 2 mm	16	256	0

Description

This tape is particularly suitable (thanks to its softness and elasticity) to absorb the pressure exerted by the screed on the slab and the consequent crushing suffered, as well as to ensure an acoustic improvement of about 2 db according to EN ISO standard and a waterproofing of the whole structure. Packaged in 8 cm rolls for 20 meters is made of chemically and carefully elasticized polyethylene towards the environment: it does not contain CFC (Freon) according to law n ° 549 of 28/12/93.

Material

Made of stretch polyethylene

Use

Used to protect the joist and waterproof the overall structure.
