LUC70-9085ADUV	Rewasi Top 150 UV+ with double adhesive tape	1,5 x 50	1	28	0

Description

Highly breathable 3-ply roof underlay polypropylene sheet. Resistant to U.V. rays and to heat, comprising of a special functional membrane sandwiched between two layers of non-woven polyester spunbond and 1 inner functional membrane in polyethylene. Packaged in single boxes = Roll of 1,50 x 50 m, packed in cellophane tape.

Material

Polypropylene and polyethylene with high protection to UV rays.

Use

Used to protect against infiltration of water, air and wind. It guarantees correct breathability, optimizing the insulation features.
