Description

90 minute fire resistant inspection hatch (EI90) with built-in (Patented) fire protection and key lock. 2 x 25 mm flame retardant plasterboard and intumescent protection. Individually Packaged in boxes.

Material

Aluminum frame with intumescent coating and fire resistant plasterboard panel.

Use

Used in self-contained dropped ceilings with fire protection EI90 (E = aptitude to block or produce flames, vapors or hot gases on the unexposed side; I = aptitude to reduce heat transmission.)
