Description

Drainage channel for the collection of meteoric waters. The material has an excellent resistance to chemicals and organic agents and it is self-cleaning. This channel is shock resistant, unbreakable and can guarantee high performances even in the presence of thermal shock (from -40 °C to 100 °C). It is available only in black colour, in different designs and sizes. External inlet diameter are ø 50/63, bottom outlet are 140/160 mm.

Material

Made of HDPE (high density polyethylene).

Use

Used for the collection and drainage of rainwater and for the discharge of liquids for industrial use. It can be combined with a wide range of gratings in order to be used in pedestrian areas, driveways, roads, highways, ports and airports.
