

FIBER GLASS MESH PREMIUM NET

| Code | Commercial Description | Dimensions | Conf. | Pallet | Selling Unit |
|-------------|------------------------|-------------|-------|--------|--------------|
| RET01-1160V | Green fiber glass mesh | 1,10 x 50 m | 55 | 1815 | M2 |

Description

fiberglass mesh available in various colours (identification code R117, corresponding to net weight per square meter of fiberglass mesh without resin). Height 1,10 x 50 meters. Packed in cellophane rolls.

Material

Used in thermal insulation coating systems, ETICS, as a reinforcement of the skim coat in order to uniformly absorb and distribute the mechanical stresses to which the system may be subjected (settling movements, shrinkage phenomena, temperature excursions, external agents) avoiding the formation of cracks in the facade.

Use

Made of Adfors Saint-Gobain type E glass fiber, impregnated with SBR anti-alkaline resins, complying with EAD 040016-01-0404 standard certified by leading European Institutes, accompanied by ITC CNR Seal of Quality, spacing 4.0 x 4.5 mm and weight of 150 gr/m2.
