

### WASHER FOR ANTI-CRACKING DOWEL

Code	Commercial Description	Dimensions	Conf.	Pallet	Selling Unit
TER14-5599	Washer for anti-cracking dowel	ø 90	25	18000	PZ

#### Description

The fixing kit Anti-Seam System consists of a disc (Ø 68 mm complete with cap), a nylon plug and a galvanised steel screw with countersunk head and cross cut. The system ensures that glass-fibre reinforced nets (Hercunet, Tritonet, or Titanet) are fixed to the ceiling and can then be left exposed or plastered. The closing cap of the fixing disc completes and insulates by avoiding thermal bridges and, in the case of visible fixings, improves the design.

#### Material

Made of PP (polypropylene).

#### Use

Used for securing concrete ceilings or false ceilings.
